During printing process slight deviations in colors and graphics may occur so that some of the products shown in this catalog may differ from the original ones. Link International cannot be considered responsible for such discrepancies. Link International reserves the right to change or alter the products shown. The images of the products shown in the catalog are purely indicative and do not bind Link International to supply the client with a product that is identical to such images. In particular, all "AGV" brand helmets sold by Link International are provided only with transparent visors. Tinted visors, which can be ordered as accessories and subsequently installed by users, are only intended for competitions and private race tracks and therefore must never be used for any reason on public roads or in public traffic circulation.

RACING

PISTA GP RR

08

PISTA GP RR

THE PISTA GP RR IS AN EXACT REPLICA OF THE AGV HELMET USED IN RACES BY PROFESSIONAL WORLD CHAMPIONSHIP RIDERS. IT HAS THEREFORE RECEIVED FIM HOMOLOGATION, WHICH CERTIFIES THE HIGHEST POSSIBLE LEVEL OF PROTECTION, EVEN AGAINST ANY DANGEROUS TWISTING OF THE HEAD.

EVERY DETAIL IS DESIGNED TO ENSURE ULTIMATE PERFORMANCE.

The Extreme Carbon shell in 100% carbon fiber guarantees extraordinary resistance and lightness, which make it effortless to wear. Its shape and the metal air vents have been researched in the wind tunnel and tested by AGV athletes to ensure perfect ventilation inside the helmet. These combine with the innovative profile of the rear PRO Spoiler to guarantee the best possible aerodynamic penetration and maximum stability at high speeds. Boasting 5 mm thickness, the optical class 1 Ultravision visor is an integral part of protection that enables 190° panoramic vision. This means the rider sees the track, adversaries, and obstacles more clearly, before anyone else. The exclusive 360° Adaptive Fit system allows for complete customization of the interior, giving the rider the possibility to select the ideal thickness for the upper part of the head, nape, and cheeks.

Size	XS	S	MS	ML	L	XL	XXL
Part No.	77-125-04	77-125-05	77-125-06	77-125-08	77-125-09	77-125-10	77-125-11

The helmet created for MotoGP™ is now available to every rider. Pista GP RR is an exact replica of the AGV helmet used in races by professional world championship riders. It has therefore received FIM homologation, which certifies the highest possible level of protection, even against any dangerous twisting of the head.

ECE 22.05 Approved
Weight: 1350g (+/- 50g) (in first shell size)

Shell Size	1		2	3		4	
Size	XS 53-54	S 55-56	MS 57-58	ML 59-60	L 60-61	XL 61-62	XXL 63-64

TECHNICAL FEATURES

SHELL

- 100% Carbon fiber
- 4 shell sizes
- 5-density EPS developed in 4 sizes
- Shell and EPS structure designed to minimize rotational accelerations (FIM homologated)
- Collarbone safe profile

VENTILATION

- 5 front vents
- 2 rear extractors
- Metal air vents and extractors

AERODYNAMICS

- Detachable PRO Spoiler
- Race suit fitment

INTERIORS

- Cheek pads: Shalimar fabric for soft and stable fit even at high speed
- Crown pad: elastic and breathable microfiber
- Neck roll: breathable fabric with elastic and waterproof inserts
- Sanitized®: Antibacterial protection
- 2Dry: instant sweat absorption
- Microsense: premium skin comfort
- 360° Adaptive fit
- 3-piece adaptable crown pad fit

- No stitches in sensitive areas
- Embracing neck roll profile
- Cheek pads safety release system
- All parts are easily removable and washable
- Removable nose guard
- Removable wind protector

VISOR

- 190° horizontal field of view
- 85° vertical field of view
- Up to 5mm thickness
- Optic class 1
- 100% Max Vision Pinlock (120) included
- Anti-scratch
- Metal visor mechanism

- Patented Extra Quick Release System
- Patented visor lock system
- Micro-opening system

RETENTION SYSTEM

- Titanium Double D

ACCESSORIES INCLUDED

- Interiors customization kit: Top crown pad, rear crown pad, cheek pads
- Iridium Red visor (only for Intrepido colourway)
- Hydration system
- Tear-off kit
- Vents covers
- Earplugs

K6 S

ALL THE TECHNOLOGY DEVELOPED FOR PROFESSIONAL MOTOGP RIDERS, IN A HELMET THAT'S IDEAL FOR EVERY ROAD USE. K6 S IS THE ESSENCE OF VERSATILITY, DEVELOPED FOR MAXIMUM PERFORMANCE. SUITABLE FOR EVERY TYPE OF RIDING AND ALL ROAD SURFACES, IT INCORPORATES THE BEST CHARACTERISTICS FROM THE SPORT AND TOURING WORLDS AND IS IDEAL FOR TAKING ON ANY TWO-WHEELED CHALLENGE, FROM LEANING INTO THE TURNS ON WINDING ROADS TO LONG-RANGE TRIPS, BY WAY OF EVERYDAY CITY RIDES.

Its carbon and aramid fiber shell ensures the very best protective performance in its category and makes it the lightest full-face road helmet in the world. Due to the stringent AGV Extreme Safety design protocol, K6 S passes all the tests required by the strict ECE22.06 standard by a large margin, making the helmet safer than the levels required by the latest road homologations.

The aerodynamic shapes developed in the wind tunnel are optimized for ideal air penetration in any riding position, making this solution perfect for riders who want the freedom to select their own riding styles, without compromise. The aerodynamic spoiler evolves to split the air and limit buffeting at cruising speeds. The superior comfort eliminates distractions and lets you focus only on the road and obstacles, throughout the journey.

AGV's latest version of this premium sport helmet now features a new construction for the inner liner, designed with high-performance fabrics and with no stitching in sensitive areas, making for an extremely comfortable fit. The lightweight shell is made from a carbon-fiberglass mix, while stability and aerodynamic performance are maximized thanks to an incorporated spoiler. The Integrated Ventilation System (IVS) has vents that are hollowed into the shell, and there's also an internal drop-down sun visor, a removable nose guard and a new wind protector that keeps noise to a minimum.

ECE 22.05 Approved
Weight: 1390g (+/- 50g) (in first shell size)

The new Tourmodular is homologated according to the new ECE 22.06 regulation and the dual P/J homologation. It is a very safe and comfortable modular helmet with an integrated DMC Mesh communication system, the highest standard of wireless communication between motorcyclists. The Tourmodular has been designed to tackle long trips with maximum comfort and safety. Outer shell made of carbon fiber, aramid fiber and fiberglass. Its soft interior made of Ritmo and Shalimar fabric with a custom fit system guarantees immediate absorption of moisture and sweat. It also has an integrated sun visor, as well as an efficient integrated ventilation system.

AGV INSYDE COMMUNICATION SYSTEM

AGV INSYDE is the first system to feature DMC™ Dynamic Mesh Communication technology integrated with a modular helmet. The most advanced motorcycle intercom ever produced, developed exclusively by Cardo, meets AGV Tourmodular, the ultra-protective helmet for taking on endless journeys. DMC™ technology allows superior audio quality and connection stability for communication between riders, in all conditions. Just set it with a click, and AGV INSYDE will do the rest, establishing a stable connection between up to 15 riders, 1.2 km apart, with a total range of up to 6 km.

TECHNICAL FEATURES

COMPATIBILITY

It's fully compatible with any other Bluetooth® device. DMC™ technology enables continuous, uninterrupted communication. Unlike intercoms with Bluetooth® technology alone, when one or more riders join or leave the conversation, the chain of communication continues in a linear way without ever being interrupted. It also offers endless possibilities. AGV INSYDE lets you receive calls, include them in the communication with other riders connected via intercom, listen to music from any device with Bluetooth® connection and share it with your passenger and listen to FM radio with RDS system and automatic selection of the most stable signal. All this can be managed simply and intuitively by hand with a single touch, or directly with voice commands through the sophisticated Natural Voice technology.

VERSATILITY

AGV INSYDE manages all audio signal sources [Intercom, music, calls, FM radio] through a sophisticated algorithm that allows them to be received independently in parallel, for an experience characterized by maximum continuity. Entering and leaving conversations, listening to music and communicating with other riders occurs automatically and directly, without any kind of interruption or the need to disconnect and reconnect to the group. There are no distractions, just continuous communication.

AUDIO & CHARGING

The automatic volume control system also ensures superior audio quality, automatically adjusting the level according to external sounds and ambient noise, always maintaining the same level of clarity for the rider. The long-lasting battery provides up to 13 hours of continuous call time. But that's not all. You can also use AGV INSYDE while it's charging. This lets you ride with the system plugged into a power bank or 12V outlet, guaranteeing charging even when you're on the move. Communication never stops.

INTEGRATION

AGV INSYDE, developed with Cardo and compatible with full integration with the AGV Tourmodular helmet, is IP65 certified and has a smartphone interface app, compatible with iOS and Android operating systems.

Lightness, comfort and adaptability reach the highest technological level in the AGV AX9. Its superior modularity allows 4 different configurations, simply removing the redesigned peak and the ultra-panoramic visor. The lightweight construction of the Carbon+Aramid+Glass fiber shell provides AGV highest safety standards, while premium interiors are water resistant and extremely comfortable. Aerodynamics and ventilation reach a new standard thanks to new extractors and the new adjustable chin guard port that can direct internal air flows where the rider need.

MATT BLACK

MONO

Size	XS	S	M
Part No.	77-452-04	77-452-05	77-452-07

Taking the modular-helmet concept to the next level, the Compact ST has been homologated in both the closed and open positions, and its compact design when in the latter configuration means aerodynamic performance is surprisingly capable. There's an internal drop-down sun visor, and the new interior is designed for maximum comfort, with high-tech fabrics and carefully positioned stitching. The ultimate in adaptability, this helmet is equally appropriate for city riding and out of town.

ECE 22.05 Approved
Weight: 1780g (+/- 50g) (in first shell size)

Shell Size	1				
Size	XS 53-54	S 55-56	M 57-58	L 59-60	XL 61

TECHNICAL FEATURES

SHELL

- High Resistance Thermoplastic
- 1 shell size
- 4-density EPS developed in 2 sizes
- Chin guard opening system designed to prevent accidental opening
- Metal chin guard block system ensures the double homologation P/J

VENTILATION

- 4 front vents
- 2 lateral extractors
- Adjustable air vents under the air vent
- Internal deflector on the chin guard air vent

INTERIORS

- Cheek pads: Fresh and fluid Ritmo fabric
- Crown pad: Shalimar fabric for a soft and gentle touch
- Neck roll: Shalimar fabric with water resistant treatment
- Sanitized®: Antibacterial protection
- 2Dry: Instant sweat absorption
- Microsense: Premium skin comfort
- Reflective inserts
- All parts are easily removable and washable
- Removable nose guard

- Removable wind protector
- Ready for generic communication system

VISOR

- 190° horizontal field of view
- Pinlock included
- Anti-scratch
- Multistep visor mechanism
- Patented Extra Quick Release System
- Integrated anti-scratch sun visor, removable without using tools

RETENTION SYSTEM

- Micrometric

Part No.	77-709-04	77-709-05	77-709-07	77-709-09	77-709-10	77-709-11

Featuring ECE 22.06 homologation, the new K5 Jet Evo is a high-performance, versatile helmet that's equally at home for city riding or touring. The carbon-fiberglass shell features an integrated spoiler for maximum stability and aero performance, while the anti-scratch, Pinlock®-ready shield extends below the chin and utilizes an effective new mechanism called Visor Magnetic System (VMS). Ventilation is key, with multiple vents front and rear, as well as a new internal sun visor for optimal vision.

ECE 22.06 Approved
Weight: 1350g (+/- 50g) (in first shell size)

Orbyt is the ultimate AGV jet helmet, designed for maximum comfort, freedom and protection in the urban environment. Ultra comfortable interiors make every ride easy and enjoyable. The central air intake is strategically positioned in such a way that it isn't affected by the sun visor position. Its smooth mechanism allows a perfect activation also wearing gloves. AGV safety standards are ensured by multi densities EPS construction, that guarantees superior impact performances. Riding is always fun.

CLEAR

TINTED

IRIDIUM BLUE

IRIDIUM SILVER

IRIDIUM GOLD

The clear visors are homologated according to the safety standards currently in use in your country. The tinted and iridium shields do not meet the safety standards adopted worldwide. These shield can only be used for competitions and private race tracks. AGV denies any and all responsibilities deriving from such use.

For the full range of visors visit www.agvhelmets.com.au

DRY HYDROPHILIC TECHNOLOGY

The Pinlock® shield insert is made out of a material that contains moisture absorbing properties, which reacts like a sponge and absorbs moisture effectively, to keep your helmet shield fog free.

The inner part of the Pinlock® is lined with a silicon bead, which forms an air-tight chamber when it is installed against the inside of the face shield. The pocket of air that is trapped in between the lens and shield acts as an insulator for the inside temperatures in the motorcycle helmet. Efficient absorption properties combined with the double glazed like feature, the Pinlock® lens insert is the most effective, durable and affordable anti-fog solution on the market.

PINLOCK® 70

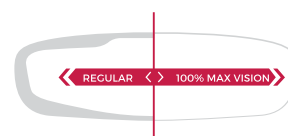

The Pinlock® 70 fog resistant insert lens is our premium solution. This lens has become the global benchmark for fog resistant performance and is most commonly used across the world. It offers the rider the perfect fit for the daily commute.

PINLOCK® 120

The Pinlock® 120 fog resistant insert lens is the solution for professionals. This lens is specially developed for usage in highly demanding conditions such as on the racetrack or adventure riding. The Pinlock® 120 insert lens has proven its extreme performance in premier racing series like WSBK, MotoGP and Formula 1.

PINLOCK® 100% MAX VISION®

The Pinlock® 100% Max vision insert lenses provides a maximum lens coverage area within the helmet shield. The extended coverage of the Max vision lens reaches to the edges of the face shield to provide a larger fog resistant cover area. By working closely together with helmet manufacturers a custom cavity area is designed. This cavity integrates the lens into the helmet shield assuring the perfect fit.

PINLOCK® PT (PROTECTINT™)

The Pinlock® ProtectINT™ sun reactive insert lens changes its tint from clear to light smoke in a matter of seconds, while keeping your helmet face shield fog free throughout the ride. This lens is especially developed for all weather riders because the insert lens reacts to UV light conditions. Pinlock® ProtectINT™ supports 100% Max Vision™.
